Main features: * Connect multiple computers (including Windows, Linux and Mac OS) to one server * Add multiple computers to a group * Administer multiple computers at once * Write and read files * Backup and restore disks and drives * Setup computers by a local network or Internet * Edit DNS by adding hosts to the local network * Wake on LAN * Create and export logs * Works on any version of Windows, Linux and Mac OS * Can be used for backup and recovery of data * Works as a service CCBoot Crack uses the same system of multiple computers by the same name, in order to be accessible from any device on the network. Besides working across a local network, CCBoot can be used on a single device. CCBoot Description: Multi-Computer Group: Just like the single computer version, CCBoot can manage multiple computers. Each computer in the group can be accessed by using its name. Properties can be edited as usual, and computer names can be changed if necessary. The group can be saved, so that the same settings can be applied at startup. It's possible to execute a script for all computers in the group, or to run specific commands for each. Clients can be added to the group, and other settings can be modified. The client cannot be removed from the group. CCBoot Screenshots: CCBoot Client Setup: CCBoot Client Setup: Installed. Backup & Restore. Buttons not working. The buttons don't respond for me, but they did work before the update. I have a problem with the actual text boxes, and text button function of the add client software. They're supposed to be one of the features of the software, and I can't access the text boxes, and the buttons don't work. The customer support people are completely unresponsive. I have tried to uninstall it and reinstall the software, but it did not work. Help!!! (more) Hello. I had an error in the OS update, and installed another version. The two companies refused to help, so I installed a third version. CCBoot worked just fine before that, and stopped working after I performed the update, and installed another version. I have a problem with the actual text boxes, and text button function of the add client software. They're supposed to be one of the features of the software, and I can't access the text

System Requirements For CCBoot:

To function properly, DiscCraft requires a fairly beefy computer system. Please note that there are limitations on the graphics settings available, and the HD version of the game will take up significantly more space on your hard drive. DiscCraft runs in a custom built virtual machine, and will only run on Windows 2000, XP, Vista, and Server 2003. While the game will run on Windows 7, we don't have any plans to support this at this time. For full details on the minimum specifications required for the game, please see the wiki's "Minimum System Requirements"
