ObjectDB For Java JDO Free Registration Code

What's New In?

ObjectDB for Java/JDO is a compact, yet powerful Object Database (ODBMS) for Java, compliant with the Java Data Objects (JDO) standard developed by Sun. It was written entirely in Java. ObjectDB for Java/JDO is designed to handle efficiently databases of various sizes, ranged from a few KBs to hundreds of GBs. Among its features are small footprint, high performance, rapid development, easy deployment and flexible architecture (1-Tier, 2-Tier or N-Tier). The programming language used to write ObjectDB for Java/JDO was Java. The jar library containing the ObjectDB source code is a real Java library and is licensed under the LGPL, so there's no need for further licensing. ObjectDB for Java/JDO is free software; you are free to use it and to study it under the terms of the GNU General Public License. However, if you redistribute it, you must put the full copyright notice on the new code, that is, the same copyright notice that appears on the source code of the ObjectDB for Java/JDO project itself. If you make changes to the software, you may include them in your derivative works (as explained in the GNU General Public License, and no license fees are required). However, as a special exception, you may include this exception for greater "fair use" purpose, with a proper copyright notice. In such a case, the "Derivative Works" may include the source code of the actual software under the GNU GPL, providing the derived work includes the source code of ObjectDB for Java/JDO itself. This allows you to share your improvements with the rest of the world, and to redistribute the work in whole or in part, under the terms of the GNU General Public License. As a special exception, the copyright holders of ObjectDB for Java/JDO give you permission to link ObjectDB for Java/JDO with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that the copyrighted headers and footers of ObjectDB for Java/JDO are preserved in all such executable that references ObjectDB for Java/JDO. As for all free software, your contributions to ObjectDB for Java/JDO are welcome. If you make changes to ObjectDB for Java/JDO, the rules for obtaining permission to use this software is detailed in the LICENSE file included in the ObjectDB for Java/JDO project. The current version of ObjectDB for Java/JDO is available from the main ObjectDB for Java/JDO project website. The most recent version is 2.3.0. ObjectDB for Java/JDO is developed as a free project by volunteers. Anyone can contribute. To get in touch with the team, please contact the
